

ASSIGNMENT NO-13

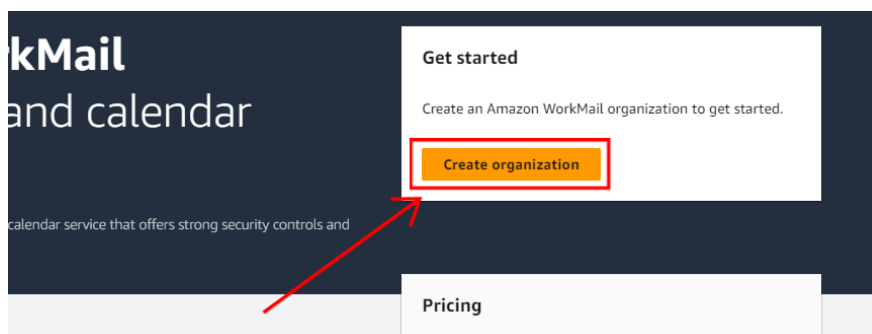

Problem Statement:- Create a workmail for your organization.

Steps:-

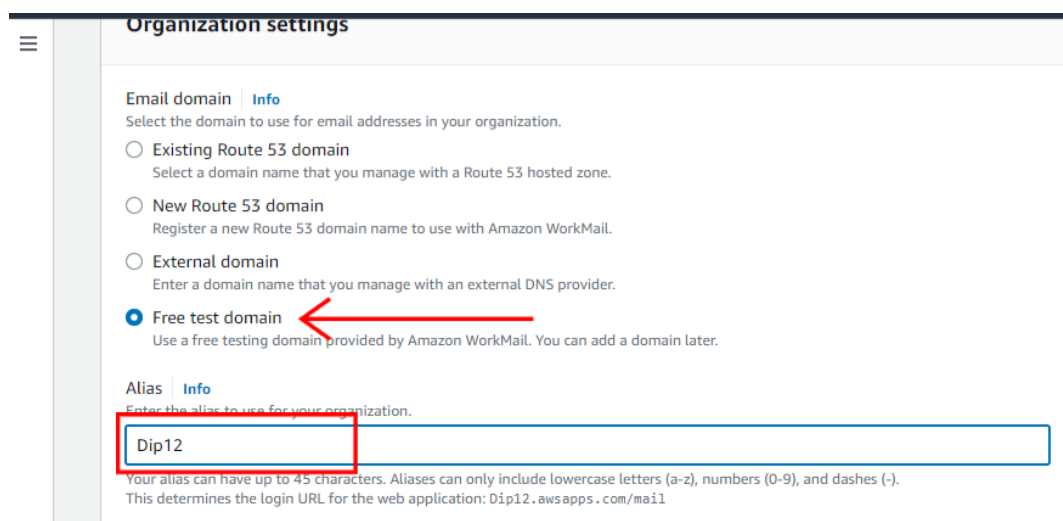

1. **Sign in.** Sign in to your **AWS account**.
2. Search **WorkMail**.

3. Click on **create organization** to create an organization.

4. Click on **Free test domain**, after that enter your **organization name**.

5. In the advance settings, set **user direction** as **Create Amazon WorkMail directory** and set **encryption** as **Use Amazon WorkMail key**. And Click on **create organization**.

▼ Advanced settings

User directory | [Info](#)
Select the directory where you manage your users.

☒ Create Amazon WorkMail directory
Create a directory and add your users to it. This directory is only for WorkMail and cannot be used with other AWS services or applications.

☐ Use existing directory
Use an existing directory to manage your users, such as an Active Directory.

Encryption | [Info](#)
Select an encryption key to help secure your data. Encryption keys are in AWS Key Management Service (AWS KMS) in your account.

☒ Use Amazon WorkMail managed key
Use the encryption key that we create in your account.

☐ Use existing customer managed key (CMK)
Use an existing CMK you created in AWS KMS.

Cancel **Create organization**
