

Assignment 6

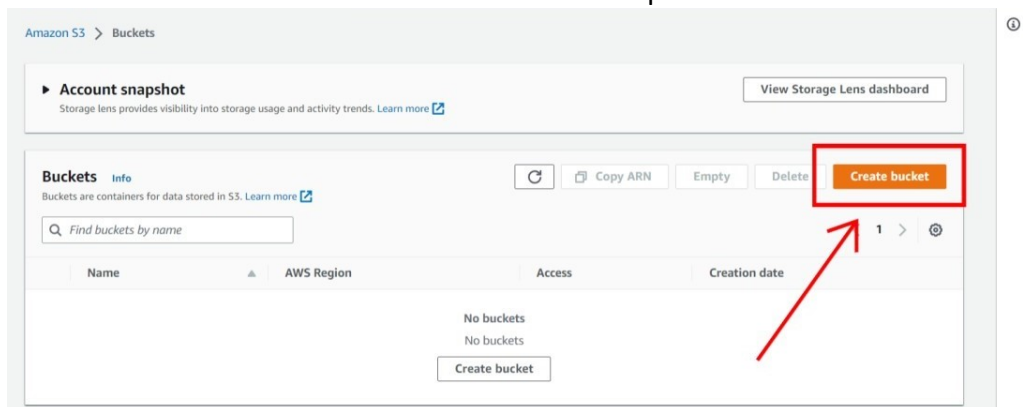

Upload static website on S3 and run it.

Steps for creating an AWS account:

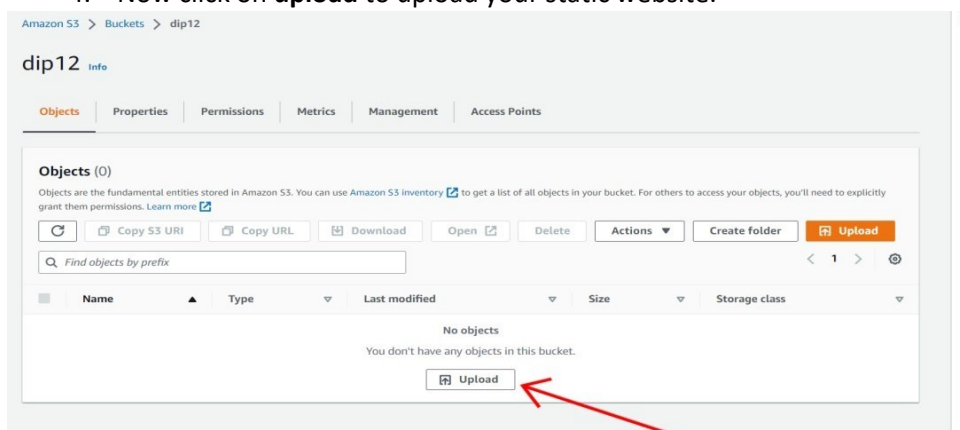

1. **Sign in.** Sign in as a root user. Provide username and password when prompted.
2. Search on the search bar **S3**. After that click on **bucket** in the **S3**.

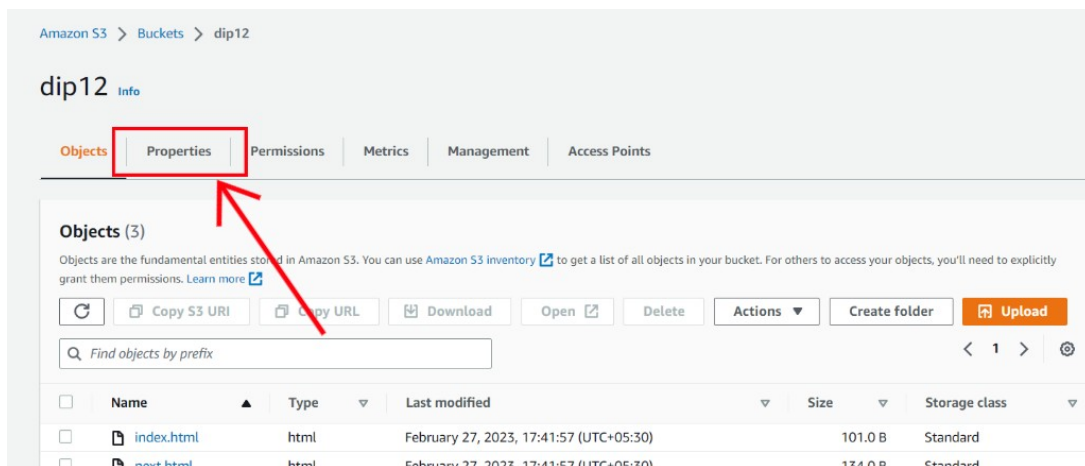

3. Now click on **Create bucket** and create a public bucket.

4. Now click on **upload** to upload your static website.

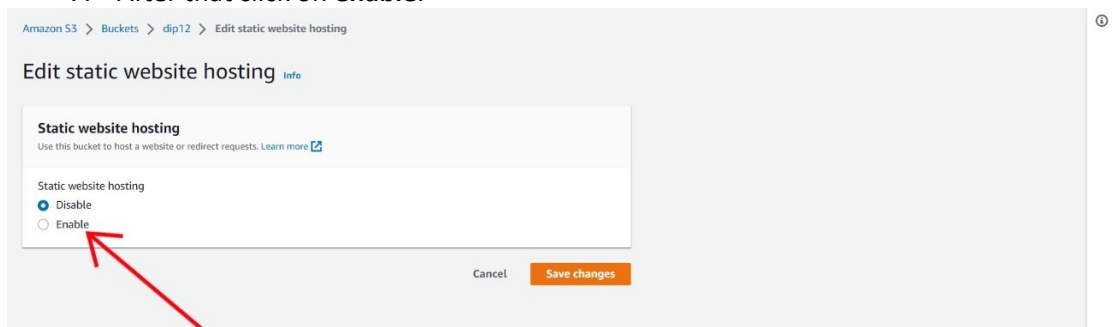

5. After uploading the files click on **properties**.

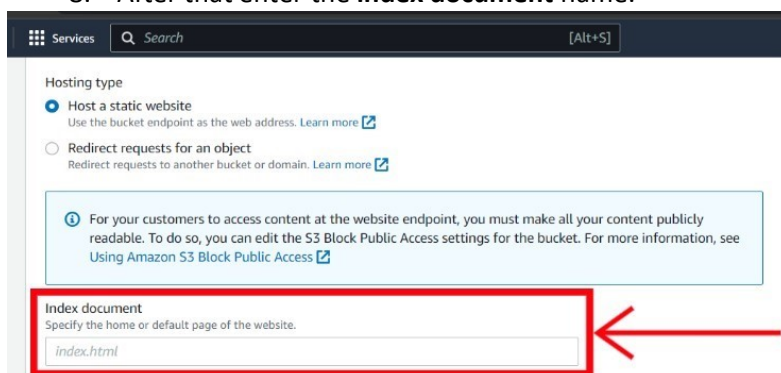

6. In properties scroll down and at the bottom in the **Static website hosting** portion click on **edit**.

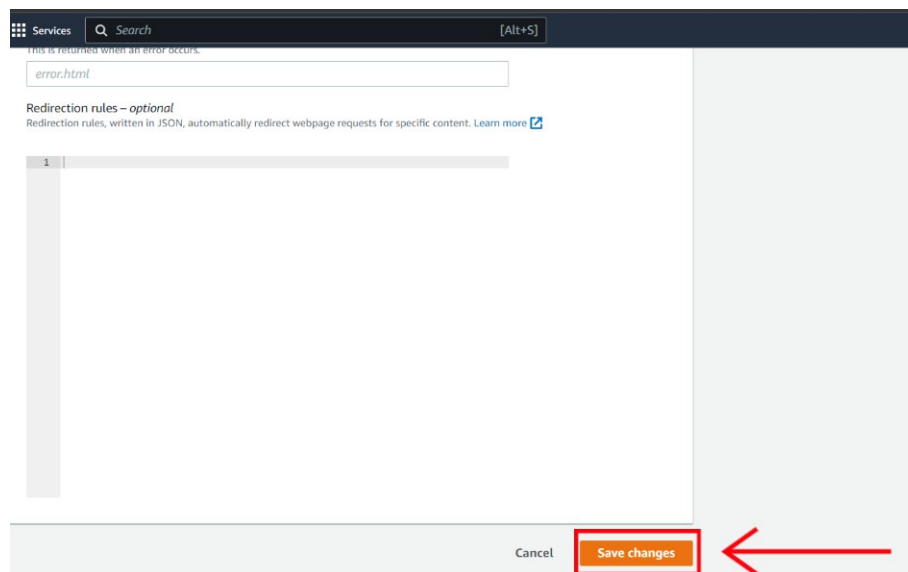

7. After that click on **enable**.

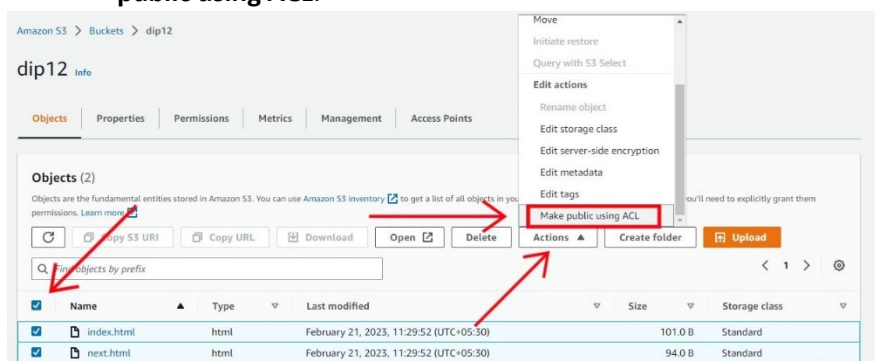

8. After that enter the **index document** name.

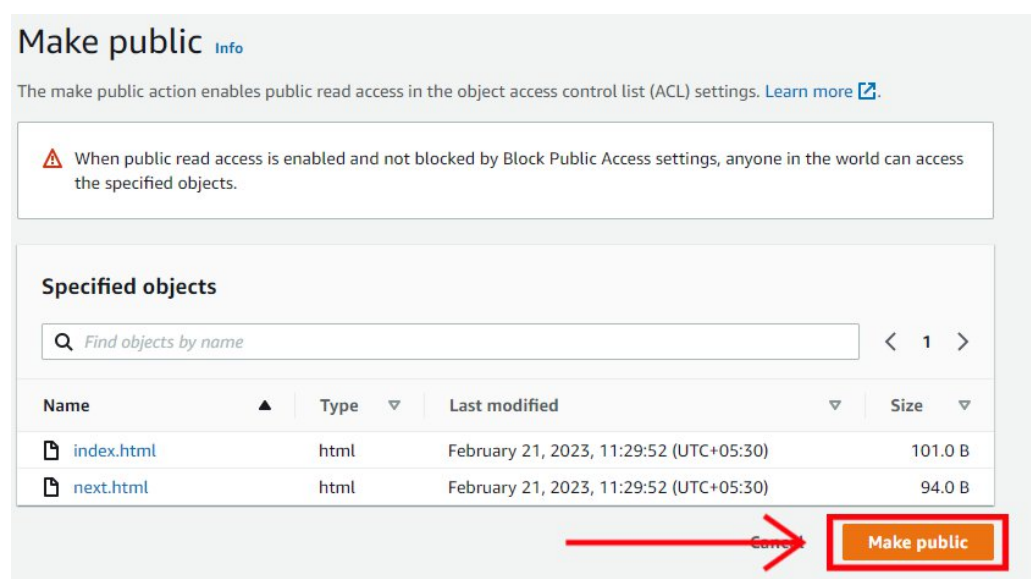

9. Click on **Save change**.

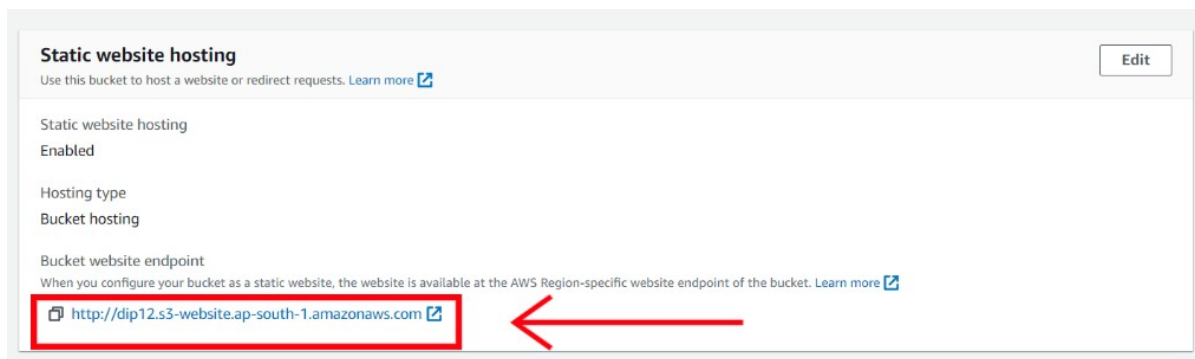

10. After select **all file** that you have uploaded and click on **actions** after that click on **Make public using ACL**.

11. After that click on **Make public**.

12. In the properties section copy the link and open in a new tab.

13. You can see that you website is now live.
